

Carbon Reduction Plan

Supplier name: Croyde Medical Ltd

Publication date: 27 June 2025

Commitment to achieving Net Zero

Croyde Medical Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024

Additional Details relating to the Baseline Emissions calculations.

Croyde Medical Ltd are fully engaged with reducing our carbon footprint with the aspiration of achieving Net Zero by 2050. Our carbon footprint was calculated for 23/24 but this excluded Scope 3 emissions, therefore we have re-baselined (2024) taking cognisance of Scope 3 emissions and providing a true representation of our carbon footprint. We do however recognise that as a small SME we are reliant upon the global effort to have a true impact on the reduction of our Scope 3 emissions, while Scope 1 and 2 are within our control to directly influence a sustained reduction towards our goal of Net Zero by 2050.

For reporting methodology and exclusions for 2024 Croyde Medical Ltd have:

Adopted Operational Control approach to establishing the boundary. The methodology adopted in line with the Greenhouse Gas Protocol.

Do not have air conditioner or heat pump in our buildings.

Have reported emissions from company owned or operated vehicles by fuel consumption.

Have reported emissions from business travel undertaken in employee vehicles by mileage claimed.

Have reported emissions from other business travel by expenditure.

Have reported emissions from employee commute using national transport statistics and number of full time equivalent employees

Have reported emissions from working from home.

Have reported emissions from waste to report by quantity.

Have reported emissions from upstream transportation and distribution by expenditure.

Have reported emissions from downstream transportation and distribution by weight and distance for road transportation.

Have reported emissions from purchased goods and services by expenses.

Baseline year emissions: 2024

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	34.95
Scope 2	1.6
Scope 3 (Included Sources)	370.04
Total Emissions	406.58

Current Emissions Reporting

Reporting Year: 2024

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	34.95
Scope 2	1.6
Scope 3 (Included Sources)	370.04
Total Emissions	406.58

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 300 tCO₂e by 2030. This is a reduction of 27.3%. (This projection equates to Scope 1 reduction of 17.5 tCO₂e (50%), Scope 2 reduction of 0.8 tCO₂e (50%) and Scope 3 reduction of 88.33 tCO₂e (24%).

Progress against these targets can be seen in the graph below:

Fig 1: Croyde Medical Ltd tCO₂e Emission Reduction Targets 2024 - 2050

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

Our decision to re-baseline for 2024 to include Scope 3 emissions, allows Croyde Medical to focus on further reducing our carbon emissions year on year, working towards net zero as illustrated on the above graph. The following environmental management measures and projects have been implemented since the 2024 baseline; these are all within our direct control and measurable, contributing towards our commitment to drive down our carbon emissions. These measures and others as we mature into this journey to Net Zero will be in effect when performing the contract:

- We are taking occupancy of new, modern premises with effect from October 2024.
- We are increasing use of online meetings, reducing the need for travel.
- We promote flexible / hybrid working where the role permits.
- We encourage increased recycling of all waste products and promote the same for employees at home. (Cardboard, Plastic, Tins, Shredded Paper, Printer Cartridges)
- Our business dealings are now 90% paperless with a new Customer Relationship Management (CRM) system.
- We are increasing improved energy reduction awareness by switching off energy consumption sources that are not require; switching lights on / off as required, unplugging appliances when not in use etc.
- We are reviewing our company policies to embrace carbon reduction opportunities and implement in line with our commitment to Net Zero by 2050.

In the future we hope to implement further measures such as:

- Working with our supply chain to influence their carbon emissions with a positive effect on our own Scope 3 emissions.
- Adopting 'Best Practice' from within our sector and from neighbours.
- Consider ISO14001 certification.
- Set reduction targets for the consumption of electricity, gas and water.
- Reduce the amount of recyclable waste produced with the receipt and delivery of our products.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Stuart Hobin
