

CROYDE ELECTRIC MATERNITY RECLINER

The Croyde Electric Maternity Recliner is designed for comfort with adjustments that can be made at the touch of a button.

The Croyde Electric Maternity Recliner is primarily used post-surgery so mothers with restricted mobility can remain comfortable.

The chair is compact but still boasts a wide range of positioning options. It can tilt forward and recline with use of a remote control.

In addition to post-surgery use, the chair is perfect for partners staying overnight.

POSITIONING

The Croyde Electric Maternity Chair aids sitting, reclining, and rising at the touch of a button. It is easy to recline and quick to return to a chair in emergency scenarios.

MOBILITY AND CLEANING

The chair's wheels allow easy movement between departments or rooms with foot activated brakes. It is also compatible with hospital approved wipes and chlorine based cleaning solutions for easy cleaning.

INFANT FEEDING BENEFITS

The reclining backrest allows babies to feed in the semi-recumbent chest-to-chest position. The angled footrest and infant feeding pillow provides appropriate support and stability when the chair is upright.

CHOICE OF COLOURS

Match or contrast the Croyde Electric Maternity Recliner Chair with your room's colour scheme. We have an extensive variety of colours to choose from.
