CROYDE OPERATOR & SADDLE STOOLS

The Croyde Operator and Saddle Stools are comfortable, durable, simple gynae chairs.

The Croyde Operator and Saddle Stools are UK manufactured, high-quality stools with exceptional comfort and durability.

They are designed to support positive posture throughout seated procedures and are hydraulically adjustable to deliver optimum working height positions.

Both stools are available in a wide range of colour options with optional extras for the Operator Stools for added comfort.

OPERATOR STOOLS

These simple and effective stools can make any procedure efficient and comfortable. They are Crib 5 compliant and approved for use with hospital wipes and chlorine-based cleaning solutions.

Castors are supplied as standard but can be swapped for glides (feet) if preferred. Load-locking castors are also available to brake the stools automatically, once weight is applied.

SADDLE STOOLS

The differently designed Saddle Stools are intended to be comfortable and deliver optimum working positions.

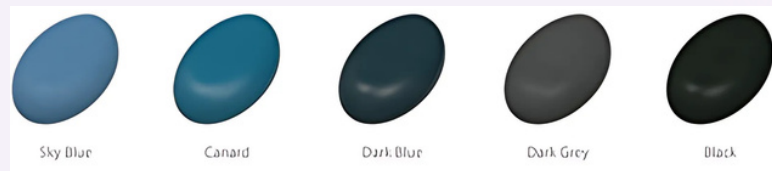

As well as being height adjustable, the seat can be tilted to suit the needs of the procedure. Available with a range of options to suit the user, the stools can be chosen with optional foot ring, castors/glides and load-on castor brakes.

OPERATOR STOOLS EXTRAS

For added comfort, the Operator Stools can be purchased with a set of arm rests and/or a back rest.

The foot rest can also become height adjustable as an optional extra.

COLOUR OPTIONS

Both stools can be selected from a wide range of colours. Our standard colours, including our most popular colour Sky Blue, range from blue to black. Our standard+ colours aim to brighten any hospital unit.
