

CROYDE ERGOKNEELER

The innovative Ergokneeler is an ergonomic kneeling system that protects knees and promotes good musculoskeletal health.

The Croyde Ergokneeler has been expertly designed to help reduce compression forces and postural discomfort when working at low heights.

This enhances comfort levels for midwives who are supporting women in a birthing pool or when using active birth equipment such as a floor mat and beanbag.

For use in birthing suites and labour wards, this solution is easy to use, transport and clean.

Moulded in polyurethane foam with active antibacterial properties, the Ergokneeler is easy and safe to clean with hospital approved cleaning wipes.

UNIQUE DESIGN

The multi-functional design can be used in both kneeling and seated positions to allow midwives to support the birthing person during active labour or in a birth pool.

EASY TO TRANSPORT

The lightweight construction means that the Ergokneeler is portable, making it easy to move in-between rooms or transport to home visits.

VARIETY OF POSITIONING OPTIONS

The versatile design of the Ergokneeler means that it can be used for kneeling or sitting, and is adjustable.
