

Sky Tile Ceilings

Bringing the outside, inside

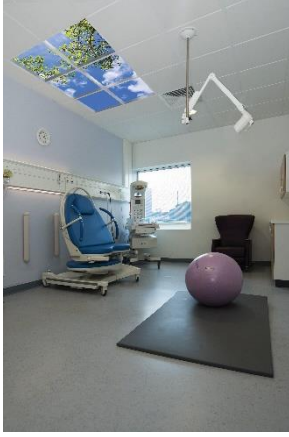

- Sky Tile ceilings can be installed into any tiled ceiling and are available in a range of shapes and sizes to suit each individual room
- They bring the appearance of natural sky-light to rooms where this may not ordinarily be possible
- Sky Tiles provide a calm, relaxed environment through the visual change that the ceilings deliver
- LED backlit, dimmable and stunningly impressive, the light volume can be changed to reflect the mood of the room
- Excellent for use above birthing pools, in bereavement suites or in rooms where there is little natural light

CROYDE MEDICAL

Maternity Equipment Specialists

- Sky Tile ceilings are available with a variety of designs that include sky, sky + clouds, sky + sun, sky + trees / blossom and lots more
- Ceilings are available in 1200mm * 1200mm sizes as standard but can be tailored to 600mm * 1800mm or any other configuration as required
- Ceilings have the option to be chosen with or without a visible cross-hatch
- Sky Tile ceilings can be installed by the local Estates team or by a recommended installer

What to do next.....

- Contact us on 01367 241194 or email us at Info@croydemedical.co.uk
- A product specialist will talk you through the various size and positioning options and send you a brochure of available images for you to consider
- There are certain installation requirements that need to be confirmed. Once you are happy with the designs and project plan, we will engage with the local Estates team to check compliance
